Structured Light Scanning System PT-M 1280 (used model)

QTSculptor 3D Scanner PT-M 1600

- resolution 1,4 mega pixel 3D-cameras
- maximum depth resolution: **12 µm**
- range: > 120mm × 90mm
- survey system consists of stripe projectors and two 3D cameras and one texture camera
- all necessary cables
- tripod
- standard calibration panels in different sizes
- carrying case with matching foam plastic capping

Software

- QTSculptor Software
- calibration of the sensor head
- acquisition and processing of 3D scan-data
- export of waterlight triangular meshes (3D-Modell)

Training

- 2-day training

Das Gerät ist in einem einwandfreien technischen Zustand und wurde nur wenig gebraucht.
The scanner has been used in some projects and is of faultless technical condition.

Listenpreis: ~~55.350 €~~

Messepreis: 39.000 € (netto)
